About 366Pi Tech

1. Technology should solve real business and sustainability problems

366Pi is not just building software — they focus on helping businesses become smarter, sustainable, and future-ready using technology.

They believe:

“Digital transformation is incomplete without sustainability.”

2. Their core vision is “Coding Solutions to Decarbonize Enterprises”

This is their main identity.

Meaning:

- Use technology to reduce waste
- Improve efficiency
- Help businesses become environmentally responsible
- Build systems that support long-term growth

3. They focus heavily on Digital Workplace Transformation

They help companies improve:

- Collaboration
- Communication
- Productivity
- Knowledge sharing

Using tools like:

- Microsoft 365
- SharePoint
- Power BI
- Microsoft Azure
- IoT solutions

About FloCard

1. FloCard is more than a digital business card

FloCard is not just about sharing contact details digitally.

It combines:

- networking
- sustainability
- climate action
- community impact
- green technology

into one ecosystem.

2. Their core mission is “Better Planet Together”

Their entire platform revolves around the idea that:

businesses, communities, and individuals should grow without harming the planet.

This mission is deeply connected to:

- sustainability
- climate responsibility
- collective action

3. They are solving a real-world problem with sustainability

Traditional business cards create paper waste.

FloCard replaces them with:

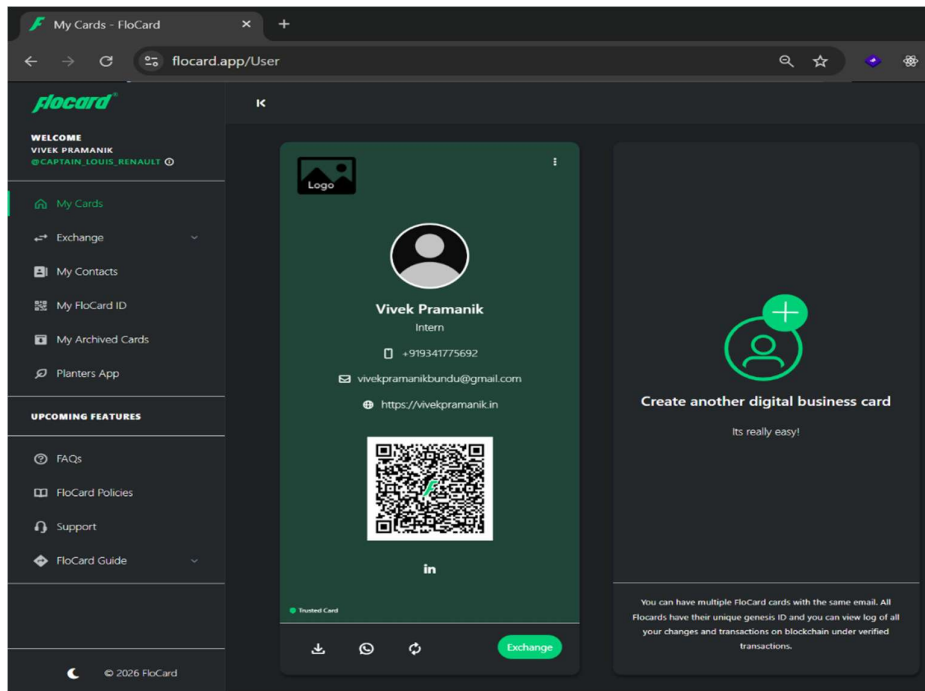

- digital business cards
- QR sharing
- app-based networking
- contactless communication

This makes networking:

- smarter
- modern
- eco-friendly

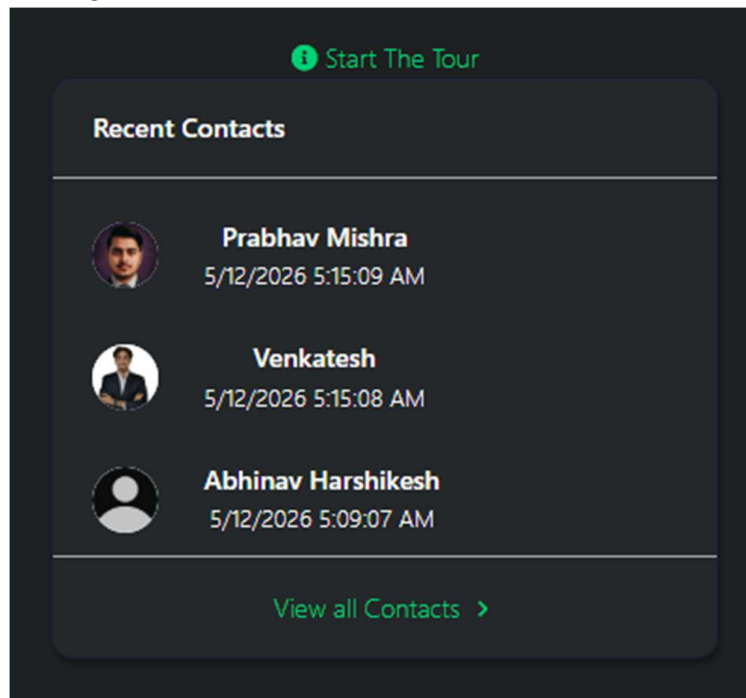

Activity 2

1. Generated FloCard

2. Added Relevant Personal & Professional Details

3. Exchanged cards with team members

Created Substack Post for FloCard Ecosystem Flow: <https://substack.com/profile/474546468-tech-start/note/c-257668850>

Tech Start 3m @coolcareer

I, Vivek Pramanik, an Intern at 366Pi Technologies, am sharing this as part of my "Understand the FloCard Ecosystem Flow" onboarding activity, where I am documenting and sharing my learnings.

Understanding the FloCard Ecosystem: Where Networking Meets Sustainability
Most platforms focus on either technology, networking, or sustainability. FloCard tries to combine all three into one connected ecosystem.

At its core, FloCard is not just a digital business card platform. It is an ecosystem designed around climate action, sustainable growth, and measurable environmental impact.

Individuals: From Networking to Responsible Identity
For individuals, FloCard begins with digital networking. Users create smart digital business cards that can be shared instantly through QR codes, apps, or unique identifiers. But the platform goes beyond convenience. Every interaction becomes part of a larger sustainability movement called #BetterPlanetTogether.

Instead of printing paper cards that eventually become waste, users adopt a greener and more modern identity system while signaling their support for climate-conscious innovation.

Communities: Creating Collective Sustainability Impact
Communities, NGOs, and local initiatives use FloCard to build visibility around sustainability-driven work. The platform helps communities align with Sustainable Development Goals (SDGs), connect with partners, and showcase measurable impact.

FloCard acts as a bridge between local action and global sustainability goals by enabling collaboration, transparency, and community-led environmental projects.

Tree Planters: Making Restoration Transparent and Measurable
One of the strongest parts of the FloCard ecosystem is the Planters App.

Tree planters can tag, track, and trace plantation projects using technology-driven monitoring systems. Every plantation site can be uniquely identified and monitored in

monitoring systems. Every plantation site can be uniquely identified and monitored in real time through dashboards and analytics.

This creates accountability, improves trust, and helps businesses and stakeholders verify environmental impact instead of relying on assumptions.

A Bigger Vision
FloCard represents a growing shift in how technology is being used — not just for business efficiency, but for environmental responsibility and long-term sustainability.

The platform combines digital identity, climate action, restoration tracking, and sustainability engagement into one ecosystem with a simple vision:
Build a better planet together.

FloCard One Ecosystem. Many Impact Paths.
Connecting People, Communities & Planets for a Sustainable Future.

The FloCard Ecosystem Flow

- Individuals**
Create smart digital business cards
Share instantly via QR codes, apps, or unique identifiers
Adopt a greener identity system
- Communities**
Align with Sustainable Development Goals (SDGs)
Connect with partners
Showcase measurable impact
- Tree Planters**
Tag, track, and trace plantation projects
Use technology-driven monitoring systems
Uniquely identify and monitor every site

Our Shared Purpose
Build a better planet together

Key Features:
- Smart digital business cards
- Sustainable growth
- Measurable environmental impact
- Collaboration & transparency
- Community-led projects
- Unique identifiers for every site
